

9.1

My Clean & Green Community

I have made a sculpture depicting our clean and green community using materials that are littered on our highways and waterways. I have used plastic, soda cans, boxes, cardboard, and paper cartons. In Allen we have a good recycling facility and programs like adopt-a-highway and adopt-a-waterway to keep our community clean. Thank you and Keep Allen Beautiful.

9.2

My Clean and Green Community

A tree standing tall, using clean water to grow, on its branches live the birds, each unique in shape and color. They all live in harmony and respect the environment and each other. This tree represents our community and it is the home of the birds. The birds symbolize the people of the community and how each one works to maintain their home clean and green. All of the birds are different colors and sizes; this shows how each and every one of us is different and how we should all take care of one another and our planet.
